

Suspension Clamp for Telecom Dropwire 4-6mm

DESCRIPTION

Suspension clamp for dropping copper cable is designed for fiber optic or copper cable, with round or flat cross section. It is made of UV resistant thermoplastic and route deviation angle up to 20°. Locking of the clamps are connected two double racks.

FEATURES

- Easy and quick installation
- Prolong the service life of optical cable
- Unlosable components
- For fiber optic or copper cable, with round or flat cross section.

APPLICATIONS

- Access network
- FTTH line constructions

SPECIFICATIONS

Parameter	Value
Capacity	4-6mm
Temperature range	-40°C/+70°C
Dimension	L 80 mm, W 16 mm, H 85 mm
Material	UV resistant thermoplastic
