

RJ45 CAT 6A 100 OHM SHIELDED SFTP CABLE WHITE 1 METER

DESCRIPTION

This brief patch cable enables you to establish connections between your network equipment (such as switches, routers, etc.) and your patch panel. It is furnished with dual shielding (both general and pair shielding) to reduce interference, along with gold contacts for enhanced durability and protection against oxidation.

FEATURES

- Cat6A cables are approved for gigabit networks, enabling faster data transmission
- The 100% copper conductor, ensures optimal data transfer
- The pair separation cross reduces interference for faster data transfers
- The overmolded sleeves provide a secure grip on the cable in the connector, enabling frequent connections and disconnections without cord damage
- The gold coating on the connector contacts prevents oxidation, ensuring a long-lasting and reliable connection.

APPLICATIONS

- PoE Connectivity for Enterprise
- Copper Cabling Solutions for Data Center
- Fluke Networks-Cable Testing

SPECIFICATIONS

Parameter	value
Category	6A
Color	White
Length	1m
Shielding	SFTP
Frequency	250Mhz
